# Connecting for innovation

## Sharon Personal Care

is a global supplier of ingredient solutions for a broad range of personal care products – including advanced preservative systems, formulation building blocks, functional ingredients and Bio-actives.

## Deep Scientific Knowledge

Our R&D team of specialists are always thinking ahead, searching for the most effective solutions, surprising the cosmetics industry with exciting product lines, based on our deep scientific knowledge and our ability to foresee future trends and industry needs.

## **Sensory profile beyond ingredients**

A cosmetic formulation is a subtle balancing act between many different ingredients, which together harmoniously create a three-dimensional architecture: texture. We consider every single ingredient, emulsifier, surfactant, solubiliser, emollient, as small elements that together define the formulas's sensory profile, consisting in stability, rheology, viscosity, but also smoothness, lightness, silkiness and all the thousand shades of sensoriality.

## **Sustainability drives our choice**

The selection of resources, the design and development of our products are in relation to the market need for environmentally friendly products from natural and renewable sources that are the perfect formulation building blocks for contemporary cosmetics, at the forefront of the latest cosmetic trends.
