STERNVITAMIN

Micronutrients for a Healthy Life

WE ADD VALUE TO YOUR PRODUCT

With our premix product series numerous different foods can be fortified with micronutrients. All premixes are developed individually for your product. Put the finishing touches to your products – with the healthy extra from SternVitamin.

Beverages: SternVit BV

Juices, fitness and energy drinks are refreshing, taste good and are perfect for fortification with micronutrients. The individually developed premixes from the SternVit BV series deliver added health value to beverages and cater for market trends. This gives our customers an edge in the marketplace.

Food supplements: SternVit FS

The market for food supplements is diverse and dynamic. Products like capsules, soluble tablets, gums and special foods for athletes demand tailor-made micronutrient premixes with vitamins and minerals. Our SternVit FS premixes meet all the requirements of different supplement applications, food trends and target groups.

Dairy products: SternVit DP

Functional milk products, enriched with the right vitamins and minerals for each target group, cater for customers' needs for healthy products. Milkshakes or yoghurt drinks are just some application examples of our SternVit DP premixes.

Bakery products: SternVit BP

In response to the ongoing health trend, the fortification of bread and bakery products with micronutrients has proved very popular. Some vitamin-mineral mixes have a very high impact on the baking result and we have the expertise to achieve an optimum result in the end product.

Cereals: SternVit CR

Fortified cereals have become increasingly popular for breakfast or as a snack between meals. Our premix series SternVit CR are suitable as a filling for breakfast cereals or the coating process, and add value to cereal products.

Confectionery: SternVit SW

Delicious and with healthy benefit: confectionery are especially suitable for fortification. Our SternVit SW premix series brings added value to hard candies, jelly beans or chewing gum.

Plant-based products: SternVit VP

A solely plant-based diet may result in a critically low intake of micronutrients. With our specifically developed micronutrient premix series SternVit VP, we offer optimum solutions for the plant-based fortification of products such as rice milk or vegan meat substitutes.

Infant nutrition: SternVit BF

Infant nutrition must comply with strict guidelines and ordinances that set narrow tolerances for minerals, vitamins and trace elements. Our micronutrient premix series SternVit BF can be precisely aligned with these requirements.

Meat and sausages: SternVit MP

With our SternVit MP premix series each meat product can be fortified with the best combination of micronutrients. We can also carry out extensive tests in the meat laboratory at the Stern-Technology Center.

Staple food: SternVit SF

More and more countries around the world are fortifying staple foods such as milk powder, edible fats or oils, salt or flour in order to ensure an adequate supply of micronutrients to the whole population. With our series SternVit SF, we offer customised premixes for all staple foods.

Food aid: SternVit FA

In many parts of the Third World, the population suffers from acute malnutrition. Together with various partners we contribute to the global fight against micronutrient deficiencies. With SternVit FA, we offer high quality premix solutions for example for ready-to-eat products.

Supporting micronutrients for the application areas

*Used as citrate

**Not equivalent to EU-approved health claims

- Health claim authorized
- No health claim authorized²

¹ Current status: May 2018. No guarantee is made as to completeness and most recent status.

The use of micronutrients, their combination and health claims must be examined by the manufacturer in the formulation used.

The table is intended solely as a source of ideas. Source: ec.europa.eu/nuhclaims (last update: 20 / 10 / 2016).

² Should be used in combination with substances with an authorized health claim.

HEALTH CLAIMS SUITABLE FOR FOOD AND FOOD SUPPLEMENTS¹

Application area**	Health claim
Mental Health	<ul style="list-style-type: none"> - Iodine / iron / zinc contributes to normal cognitive function. - DHA contributes to the maintenance of normal brain function. - Copper/iodine/magnesium/potassium/thiamine/riboflavin/niacin/vitamin B6/ biotin/vitamin B12/vitamin C contributes to normal functioning of the nervous system. - Calcium contributes to normal neurotransmission. - Pantothenic acid contributes to normal mental performance.
Calming the Mind	<ul style="list-style-type: none"> - Iron / magnesium / riboflavin / niacin / pantothenic acid / vitamin B6 / folate / vitamin B12 /vitamin C contributes to the reduction of tiredness and fatigue. - Copper / iodine /magnesium / potassium / thiamine / riboflavin / niacin / vitamin B6 / biotin / vitamin B12 / vitamin C contributes to normal functioning of the nervous system. - Calcium contributes to normal neurotransmission. - Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.
A Good Night's Sleep	<ul style="list-style-type: none"> - Magnesium/ thiamine / riboflavin / niacin / vitamin B6 / biotin / vitamin B12 / vitamin C contributes to normal functioning of the nervous system. - Magnesium / thiamine / niacin / vitamin B6 / biotin / folate / vitamin B12 / vitamin C contributes to normal psychological function.
Physical Performance	<ul style="list-style-type: none"> - Calcium / copper / iodine / iron / magnesium / manganese / phosphorus / thiamine / riboflavin / niacin / pantothenic acid / vitamin B6 / biotin / vitamin B12 / vitamin C contributes to normal energy-yielding metabolism. - Calcium / magnesium / potassium contributes to normal muscle function. - Iron contributes to normal oxygen transport in the body. - Magnesium contributes to electrolyte balance. - Vitamin D contributes to the maintenance of normal muscle function. - Vitamin C contributes to maintenance of the normal function of the immune system during and after intense physical exercise. - Creatine increases physical performance in successive bursts of short-term, high intensity exercise.

Application area**	Health claim
Immunity and Body Defences	<ul style="list-style-type: none"> - Copper /iron / selenium / zinc / vitamin A / vitamin B6 / folate / vitamin B12 / vitamin C / vitamin D contributes to the normal function of the immune system. - Copper / manganese / selenium / zinc / riboflavin / vitamin C / vitamin E contributes to the protection of cells from oxidative stress.
Cardiovascular System	<ul style="list-style-type: none"> - Choline/vitamin B6/folate/vitamin B12 contributes to normal homocysteine metabolism. - Magnesium contributes to normal muscle function (including heart muscle). - Vitamin C contributes to normal collagen formation for the normal function of blood vessels. - Beta-glucans / ALA contribute / contributes to the maintenance of normal blood cholesterol levels. - Oat-beta-glucans / barley-beta-glucans / replacing saturated fats with unsaturated fats in the diet have / has been shown to lower / reduce blood cholesterol. High cholesterol is a risk factor in the development of coronary heart disease. - EPA and DHA/thiamine contribute/contributes to the normal function of the heart. - DHA and EPA/potassium contribute/contributes to the maintenance of normal blood pressure. - DHA and EPA (or DHA only) contribute to the maintenance of normal blood triglyceride levels. - Replacing saturated fats with unsaturated fats in the diet contributes to the maintenance of normal blood cholesterol levels.
Acid-base Balance	<ul style="list-style-type: none"> - Zinc contributes to a normal acid-base metabolism.

Vitamin	Characterisation
STERNVIT B1 (10V2008)	Thiamine Mononitrate. The product complies with BP, EP or USP monograph. Shelf-life: Min. 48 months.
STERNVIT B1-HCL (10085565)	Thiamine Hydrochloride. The product complies with USP/ BP/ EP monograph. Shelf-life: Min. 24 months.
STERNVIT B2 (10V2001)	Riboflavin, Vitamin B2. The product complies with BP, EP or USP monograph. Shelf-life: Min. 24 months.
STERNVIT B2 PHOSPHATE (10V2013)	Riboflavin-5-Natriumphosphat. The product complies with EP, USP, BP, FCC monographs and E101 (ii). Shelf-life: Min. 24 months.
STERNVIT NIACIN (10085175)	Niacinamide, nicotinamide, nicotin acid amide, pyridine 3-carboxylic acid amide, vitamin PP, vitamin B3. The active ingredient complies with USP and FCC monographs. Shelf-life: Min. 36 months.
STERNVIT PYRIDOXIN HCL (10V2005)	Pyridoxin Hydrochloride - C ₈ H ₁₂ ClNO ₃ . The product complies with EP, BP and USP monographs. Shelf-life: Min. 36 months.
STERNVIT BIOTIN (10106115)	D-Biotin, Vitamin H. The micronutrient complies with USP/ Ph. Eur monograph. Shelf-life: Min. 24 months.
STERNVIT FOLIC ACID (10087495)	Folic Acid. The micronutrient complies with USP monograph. Shelf-life: Min. 24 months.

Vitamin	Characterisation
STERNVIT B12 1% (10102995)	Formulation of Cyanocobalamin (vitamin B12) in Mannitol. The active ingredient corresponds to FCC monograph. Shelf-life: Min. 12 months.
STERNVIT B12, 0,1% ON MANNITOL (10102985)	Vitamin B12 0,1% on Mannitol. The active ingredient corresponds to FCC monograph. Shelf-life: Min. 24 months.
STERNVIT BC 1% SD (10D1001)	Beta-carotene, provitamin A. Colorant E160a. Ingredients: Gum Acacia, Maltodextrin (corn), Sucrose, Coconut Oil, Sodium Ascorbate, Beta-Carotene (E160a), DL-alpha Tocopherol (E307), Silicon Dioxide (<1%) (E551). Shelf-life: Min. 36 months.
STERNVIT BC 10% FS (10045926)	Beta-carotene, 10%. Pro vitamin A for enrichment of foods and beverages. Colouring agent: E160a (i). Ingredients: Starch Sodium Octenyl Succinate (E1450), Beta-Carotene (E160a), Glucose syrup, Medium-Chain Triglycerides, DL-Alpha-Tocopherol (E307), Tricalcium Phosphate (E341). The product complies with EP and FCC monographs. Shelf-life: Min. 24 months.
STERNVIT C (10087686)	Sodium Ascorbate. The product complies with USP/ FCC monograph / E301. Shelf-life: Min. 24 months.
STERNVIT C, FINE POWDER (10109346)	Sodium Ascorbate. The micronutrient complies with USP, Ph. Eur. and FCC monographs. Shelf-life: Min. 24 months.
STERNVIT ASCORBIC ACID C-100 (10111244)	Sodium Ascorbate. The micronutrient complies with USP, Ph. Eur. and FCC monographs. Shelf-life: Min. 24 months.
STERNVIT ASCORBIC ACID K-100 (0301021)	Ascorbic Acid. The micronutrient complies with EP, USP, BP or FCC monograph. Meets the requirements of E300. Shelf-life: Min. 36 months.
STERNVIT ASCORBIC ACID C 97% (10059255)	Ascorbic Acid 97%, coated. Ingredients: L-Ascorbic Acid, Ethyl Cellulose. Shelf-life: Min. 24 months.
STERNVIT CA-PANTOTHENATE (10V2007)	D-Calcium Pantothenate, Vitamin B5. The active ingredient complies with FCC, USP, Ph.Eur. or BP monographs. Shelf-life: Min. 24 months.
STERNVIT D3 M (10V4007)	Dry formulation of Cholecalciferol in a matrix of modified starch, maltodextrin and sucrose. The product complies with USP monograph. For use in foodstuff. Ingredients: Maltodextrin, Modified Starch (E1450), Sucrose, Cholecalciferol. Shelf-life: Min. 24 months.
STERNVIT D3 1.0 L (10V4002)	Vitamin D3 1.0 Mio IU/g in MTC-Oil. The product complies with the current "Cholecalciferol" Ph. Eur. and the "Cholecalciferon" USP monographs. Ingredients: Medium-Chain Triglycerides, Vitamin D3 (Cholecalciferol), DL-Alpha-Tocopherol. Shelf-life: Min. 24 months.
STERNVIT E 50% SD (10V5017)	Vitamin E 50% CWS Food Grade. The active ingredient complies with USP, Ph.Eur. or FCC monographs. Ingredients: DL-Alpha Tocopheryl Acetate, Modified Starch and Silicon Dioxide. Shelf-life: Min. 24 months.
STERNVIT E 98L (10V5002)	Vitamin E-Acetate (DL-Alpha-Tocopheryl Acetate) oil. The product complies with USP/ EP/ FCC monograph. Ingredients: DL-Alpha-Tocopheryl Acetate (Vitamin E-Acetate) contentX (%): 98.0 - 102.0 %. Shelf-life: Min. 24 months.

SternEnzym

The Enzyme Designer

Enzyme	Characterisation
STERNZYM A 11035 (110154)	Baking enzymes, bread improving agent. Powdered enzyme preparation. Ingredients: enzymes, wheat flour for standardization, malt flour. Shelf-life: Min. 18 months.
STERNZYM B 7033 SF (0111019)	Flour treatment agent based on baking enzymes. Powdered enzyme preparation. Ingredients: enzyme proteins, heat treated wheat flour and starch for standardization, vegetable oil as dust-binding agent. Shelf-life: Min. 18 months.
STERNZYM B 7033 RSF (0111023)	Flour treatment agent based on baking enzymes. Powdered enzyme preparation. Ingredients: enzyme concentrate, rice flour for standardization. Shelf-life: Min. 18 months.
STERNZYM LQ 4020 SF (10038263)	Baking enzyme, powdered enzyme preparation. Ingredients: enzyme concentrate, standardized with wheat flour. Shelf-life: Min. 18 months.
STERNZYM BK QUICK & EASY (0111061)	Flour treatment agent based on baking enzymes. Powdered enzyme preparation. Ingredients: enzyme concentrate, heat treated wheat flour for standardization. Shelf-life: Min. 18 months.
STERNZYM A 8034 (0111014)	Baking enzyme, powdered enzyme preparation. Ingredients: enzyme concentrate, wheat starch for standardization, calcium phosphates as free-flowing agent. Shelf-life: Min. 18 months.
STERNZYM B 10020 SF (0110463)	Baking enzyme, powdered enzyme preparation. Ingredients: enzyme proteins, standardized with heat treated wheat flour and wheat starch, calcium phosphate (E 341) as free-flowing agent, vegetable oil as dust-binding agent. Shelf-life: Min. 18 months.

Enzyme	Characterisation
STERNZYM H (0110001)	Baking enzyme, powdered enzyme preparation based on Xylanase (EC 3.2.1.8) with natural Cellulase (EC 3.2.1.4) side activity. Ingredients: enzyme concentrate, standardized with wheat starch, anti-caking agent tri-calcium phosphates (E 341iii). Shelf-life: Min. 18 months.
STERNZYM H - DUST FREE SF (0110160)	Baking enzyme, powdered enzyme preparation. Ingredients: enzyme protein, standardized with heat treated wheat flour. Shelf-life: Min. 18 months.
SWEETASE P (111022)	Invertase (E 1103) preparation. Ingredients: enzyme concentrate, standardized with sorbitol. Shelf-life: Min. 18 months.
ALPHAMALT A5070	Flour treatment agent based on baking enzyme. Powdered enzyme preparation. Ingredients: enzyme concentrate, heat treated wheat flour for standardization. Shelf-life: Min. 18 months.
STERNZYM BK 14028	Enzyme preparation with proteolytic activity. Ingredients: enzyme, standardized with wheat dust middlings. Shelf-life: Min. 12 months.
DAIRYZYM Y 50 L (0109039)	Liquid lactase preparation. Ingredients: enzyme concentrate, standardized with glycerol (E 422) and water. Shelf-life: Min. 12 months.
DAIRYZYM F 100 P (0106035)	Powdered enzyme preparation with lactase activity. Ingredients: enzyme concentrate, standardized with maltodextrin. Shelf-life: Min. 24 months.
SWEETASE 20 P (0111008)	Enzyme preparation with Invertase activity (E 1103). Ingredients: enzyme concentrate, standardized with dextrose. Shelf-life: Min. 18 months.
TOPSWEET CROIS-SANT FG-K 0.5% (8401002)	Baking concentrate. Ingredients: pregelatinized rice flour, wheat malt flour, flour treatment agent Ascorbic Acid (E 300), enzyme concentrate standardized with heat treated wheat flour.
STERNZYM GLAC	α -Galactosidase. Powdered enzyme from nonpathogenic <i>Aspergillus Niger</i> . Break-down of polysaccharides into mono saccharides: improved digestion, fast arrival of energy, anti-diabetes, stress-monitoring.
MESOZYM/DAIRYZYM	Transglutaminase. Enzyme for Vegan application.

CITRIC IS AN IMPORTANT ACIDULANT IN FOOD/PHARMA/INDUSTRIAL APPLICATIONS

Product form	Product applications	Purpose
Citric Acid / Sodium Citrate	Soft Drinks /Beverages	<ul style="list-style-type: none">• Flavour enhancer• pH control agent
Citric Acid / Sodium Citrate	Food Conserved fruits/vegetables, Jam/jellies, Desserts, Processed cheese	Enhance flavour of fruits, preserve flavour, appearance and consistency, pH adjustment for optimal gelling, stabilize emulsions, improve microbiological stability.
Citric Acid	Pharmaceutical	<ul style="list-style-type: none">• to promote effervescence• to act as a buffer• to provide a citrus flavour to medicine
Citric Acid	Cosmetics	<ul style="list-style-type: none">• pH control agent

"Everyone at Citribel contributes every day to our circular story. It's something to be proud of."
Sanne, Sustainability Manager

Closing the circle

Circularity is at the heart of Citribel. We are the only citric acid company in the world that uses sugar molasses as its major raw material, a co-product of sugar refineries.

Our distinct manufacturing processes result in a high-end assortment of intrinsically circular products, allowing us to **transform our raw materials into new raw materials for our customers, hence closing the circle.**

A large pile of bright red chili peppers is the central focus of the image. The peppers are densely packed and have a glossy, vibrant red color. They are set against a dark, blurred background. In the upper right corner, a heat lamp is visible, casting a warm, orange glow over the scene. The overall atmosphere is one of intense heat and freshness.

axichem

PURE EFFICIENCY

PHENYLCAPSAICIN

The health benefits of chili with its active **ingredient capsaicin**, has been known for centuries. But chili is also known for being hot and not so easily consumed. aXichem's Phenylcapsaicin combines the **naturally** occurring phenyl group with capsaicin, bridged by a triple bond, resulting in an innovative, natural analogue capsaicin with high purity, where the pungency is greatly reduced.

Innovative Phenylcapsaicin adds to nature. Ecology and nature meet science to create a healthier, safer and more sustainable natural ingredient.

PURE EFFICIENCY

Phenylcapsaicin is a capsaicin engineered molecular structure, introducing a triple bond within the phenyl group that offers several benefits compared to its naturally occurring analogue. It has a purity of 98%, is easier to handle with 1% formulation in powder form and is stable in production with a high bioavailable making it very potent. Because of its higher efficiency regarding uptake, you also need a much lower dosage. It is better suited for industrial production compared to natural capsaicin, due to higher purity, reliability and the lower price.

IMPROVED HEALTH

aXivite® is an innovative natural analogue capsaicin solution for weight control and treating high blood pressure. It is also known to ease irritation in the gut and promote a healthy gut microbiota. This is the result of extensive research with proven positive health benefits for improving human health in line with nature. Its purity and concentration are exceptional, making it reliable and efficient for high volume industrial production. Studies show that capsaicin consumption has proved to reduce body weight and has the potential to treat anti-obesity. Recognised as a bioenhancer, its bioavailability is more than 4 times higher than natural capsaicin. It also works to prevent microbial dysbiosis, gut barrier dysfunction and chronic low-grade inflammation.

PUNGENCY CONTROL

To control the pungency, aXichem has developed a unique microencapsulation, engineered for specific release. The microencapsulation also enhances absorption and improves the nutrient uptake, as shown in the CACO trial¹.

AXIVITE® PROCESS DESCRIPTION

- 1) The core material microcrystalline cellulose (MCC) particles is fluidized by hot air.
- 2) A waterbased emulsion of a Phenylcapsaicin containing matrix is sprayed onto the MCC. The hot air evaporates the water from the emulsion and leaves a phenylcapsaicin containing matrix coating on the MCC particles.
- 3) Oversized particles are sieved and removed.
- 4) Particles are packaged into ready product.

¹ A comparative study on the relative uptake of Capsaicin, Phenylcapsaicin and Curcumin in single and combination formulations using a Caco-2 invitro cell assay.

SAFE TO USE

The unique microencapsulated active ingredient at 1% concentration, also serves as an easy to handle food additive which can be further developed into a finished product. According to several tests, Phenylcapsaicin shows no sign of genotoxicity, whereas high dosage of natural pure capsaicin can be toxic. This makes aXivite® safe for long-term use. Approved by the Novel Food in EU and GRAS Food in US, we have a guaranteed safe and approved product for the market, which provides improved industrial efficiency combined with strong sustainability.

aXivite® can be used in a variety of new applications, as well as a more effective and safer replacement to naturally extracted capsaicin.

BIOENHANCEMENT EFFECT OF AXIVITE®

Treatment	Dilution	Curcumin Apical 0h ug/well	Curcumin Apical 2h ug/well	Curcumin Basal 2h ug/well
Cap+Cur 001	1:1	123,3	99,5 ^a	22,4 ^a
Cap+Cur 002	1:1	12	9,2 ^b	2,7 ^a
Cap+Cur 003	1:1	1,2	0,8	0,3
Phecap+Cur 001	1:1	122,4	77,1 ^{a/c}	43,9
Phecap+Cur 002	1:1	12,3	7,4 ^{b/d}	4,8
Phecap+Cur 003	1:1	1,3	0,6 ^c	0,6

The presence of Phenylcapsaicin increased the uptake of Curcumin at all three dose levels even as compared to the Capsaicin + Curcumin formulation ($P < 0.05$) (CACO in vitro study).

Name	Plant ratio	Active molecules Titration	Format
Acai Euterpe oleracea Fruit	4:1	–	Dry extract
Harpagophytum Harpagophytum procumbens Root	–	Harpagoside - 1,5%	Dry extract
Inca Inchi Plukenetia volubilis Seed Oil		Omega 3 content ≥ 40%, Omega 6 ≥ 30% Omega 6/3 ratio = 0,7 Vitamine E ≥ 20 mg/100g	Oil
Matricaria Matricaria recutita Flowers	4:1	–	Dry extract
Turmeric Curcuma longa Root	4:1	–	Dry extract

ANTIOXIDANT

Name	Plant ratio	Active molecules Titration	Format
Acai Euterpe oleracea Fruit	4:1	–	Dry extract
Acerola Malpighia punicifolia Fruit	–	Vitamin C ≥ 17%	Dry extract
Blueberry Vaccinium myrtillus Fruit	4:1	–	Dry extract
Camu camu Myrciaria dubia Fruit	4:1	Enriched in vitamin C : 25% polyphenols	Dry extract
Elderberry Sambucus nigra Fruit	4:1	–	Dry extract
Hemp Cannabis sativa Seed Oil		Omega 6 & Omega 3 Fatty acids	Oily extract

BLOOD CIRCULATION

Name	Plant ratio	Active molecules Titration	Format
Blackcurrant Ribes nigrum Fruit	4:1	–	Dry extract
Centella Centella asiatica Leaf	–	Asiaticoside ≥ 10.0% Madecassicoside ≥ 50.0%	Dry extract
Ginkgo from France Ginkgo biloba Leaf	–	Flavonol glycosides (exp: quercetin, kaempferol, isorhamnetin) ≥ 24%	Dry extract

Name	Plant ratio	Active molecules Titration	Format
Horse chestnut Aesculus hippocastanum Fruit	–	Escin 12-16%	Dry extract
Red grapevine Vitis vinifera Leaf	4:1	–	Dry extract

CARDIOVASCULAR HEALTH / MEMORY

Name	Plant ratio	Active molecules Titration	Format
Inca Inchi Plukenetia volubilis Seed Oil	4:1	Omega 3 content $\geq 40\%$, Omega 6 $\geq 30\%$ Omega 6/3 ratio = 0,7 Vitamine E ≥ 20 mg/100g	Oil

DETOX

Name	Plant ratio	Active molecules Titration	Format
Blackcurrant Ribes nigrum Fruit	4:1	–	Dry extract
Centella Centella asiatica Leaf	–	Asiaticoside $\geq 10.0\%$ Madecassicoside $\geq 50.0\%$	Dry extract
Ginkgo from France Ginkgo biloba Leaf	–	Flavonol glycosides (exp: quercetin, kaempferol, isorhamnetin) $\geq 24\%$	Dry extract

DIGESTIVE COMFORT & GUT HEALTH

Name	Plant ratio	Active molecules Titration	Format
 Aloe vera Aloe barbadensis Leaf	200:1	–	Dry extract
Black pepper Piper nigrum Seed	2:1	–	Dry extract
Boldo Peumus boldus Leaf	–	Boldin	Dry extract
Chicoree Cichorium intybus Root	4:1	–	Dry extract
Cinnamon Cinnamomum zeylanicum Bark	4:1	–	Dry extract

EYE HEALTH

Name	Plant ratio	Active molecules Titration	Format
Blueberry Vaccinium myrtillus Fruit	4:1	–	Dry extract
Chlorella (Honey grade) Chlorella vulgaris Biomass	2:1	Lutein \geq 50 mg/100g	Powder, Frozen or fresh paste, Caps/Tabs
  Inca Inchi Plukenetia volubilis Seed Oil		Omega 3 content \geq 30% Omega 6 \geq 30% Omega 6/3 ratio = 0,7 Vitamine E \geq 20 mg/100g	Oil

FAT LOSS / SLIMMING

Name	Plant ratio	Active molecules Titration	Format
Dandelion Taraxacum officinale Root	–	Hydroxycinnamic derivatives (exp: chlorogenic acid) $\geq 0,5\%$	Dry extract
Green coffee Coffea arabica Seed	–	Chlorogenic acid	Dry extract
Green tea Camellia sinensis Leaf	–	Caffeine 3.0 - 5.0% Epigallocatechin gallate 2.0 - 5.0% Polyphenols (exp: catechin) $\geq 5.0\%$	Dry extract
Guarana Paullinia cupana Seed	4:1	Caffeine $\geq 10\%$	Dry extract
African mango Irvingia gabonensis Seed	10:1	–	Dry extract
Mate Ilex paraguarensis Leaf	–	Caffeine 2.0-4.0% Chlorogenic acid	Dry extract

IMMUNITY

Name	Plant ratio	Active molecules Titration	Format
Acerola Malpighia puniceifolia Fruit	–	Vitamin C ≥ 17%	Dry extract
Aloe vera Aloe barbadensis Leaf	200:1	–	Dry extract
Black garlic Allium sativum Bulb	4:1	S-allylcysteine	Liquid Aqueous extract
Echinacea purpurea Echinacea purpurea Root	4:1	–	Dry extract
Ginseng Panax ginseng Root/Leaf	200:1	Saponosides (exp: ginsenoide Re) ≥ 24%	Dry extract
Grapefruit Citrus grandis Seed & rind	–	Flavonoids (exp: narangin) ≥ 4,0 g/L	Liquid Aqueous extract
Inca Inchi Plukenetia volubilis Seed Oil		Omega 3 content ≥ 40% Omega 6 ≥ 30% Omega 6/3 ratio = 0,7 Vitamine E ≥ 20 mg/100g	Oil
Rosemary Rosmarinus officinalis Leaf	–	Hydroxycinnamic derivatives (exp: rosmarinic acid) ≥ 8%/DM	Dry extract

JOINT COMFORT

Name	Plant ratio	Active molecules Titration	Format
Harpagophytum Harpagophytum procumbens Root	–	Harpagoside $\geq 1,5\%$	Dry extract
Turmeric Curcuma longa Root	4:1	–	Dry extract

MOOD / RELAXING / SLEEP

Name	Plant ratio	Active molecules Titration	Format
Balm mint Melissa officinalis Leaf	8:1	–	Dry extract
Eleutherococcus Eleutherococcus senticosus Root	10:1	–	Dry extract
Matricaria Matricaria recutita Flower	4:1	–	Dry extract
Passionflower Passiflora incarnata Aerial part	–	Flavonoids $\geq 2\%$	Dry extract
Red Poppy Papaver rhoeas Flower / Petal	2:1	–	Dry extract

RESPIRATORY SYSTEM

Name	Plant ratio	Active molecules Titration	Format
Birch Bark Betula alba Oily bark extract (in sunflower seed oil)	–	Betulinic acid / Betulin	Oily extract

URINARY COMFORT

Name	Plant ratio	Active molecules Titration	Format
Bearberry Arctostaphylos uva ursi Leaf	4:1	–	Dry extract
Cranberry Vaccinium macrocarpon Fruit	4:1	–	Dry extract
Horsetail Equisetum arvense Aerial part 	4:1	–	Dry extract

VITALITY / ENERGY

Name	Plant ratio	Active molecules Titration	Format
Acerola Malpighia punicifolia Fruit	–	Vitamin C ≥ 17%	Dry extract
Ginger Zingiber officinale Root	3:1	–	Dry extract
Ginseng Panax ginseng Root/Leaf	200:1	Saponosides-titrated 24%	Dry extract
Kola nut Cola nitida Fruit/Nut	4:1	–	Dry extract

BEAUTY FROM WITHIN

ANTI-INFLAMMATORY

Name	Plant ratio	Active molecules Titration	Format
Turmeric Curcuma longa Root	4:1	Curcumine	Dry extract

DETOXIFICATION - SKIN IMPERFECTIONS

Name	Plant ratio	Active molecules Titration	Format
Blackcurrant Ribes nigrum Fruit	4:1	Polyphenols exp: cynarin) $\geq 2.5\%$	Dry extract
Chlorella (Honey grade) Chlorella vulgaris Biomass	2:1	Zinc ≥ 200 mg/100g	Powder, Frozen or fresh paste, Caps/Tabs

Name	Plant ratio	Active molecules Titration	Format
Milk thistle Silybum marianum Seed	–	Silymarin (exp silibine) ≥ 4%	Dry extract

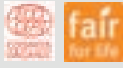

SKIN AGING PREVENTION

Name	Plant ratio	Active molecules Titration	Format
Acerola Malpighia punicifolia Fruit	–	Vitamin C ≥ 17%	Dry extract
Acai Euterpe oleracea Fruit	4:1	Polyphenols	Dry extract
Aloe vera Aloe barbadensis Leaf	200:1	Aloe sterol	Dry extract
Blueberry Vaccinium myrtillus Fruit	4:1	Polyphenols	Dry extract
Camu camu Myrciaria dubia Fruit	4:1	Enriched in vitamin C : 25%, polyphenols	Dry extract
Dandelion Taraxacum officinale Root	–	Hydroxycinnamic derivatives (exp: chlorogenic acid) ≥ 0,5%	Dry extract
Green tea Camellia sinensis Leaf	–	Polyphenols (exp: catechin) ≥ 5.0 % Epigallocatechin gallate 2.0 - 5.0%	Dry extract
Inca Inchi Plukenetia volubilis Seed Oil		Vitamine E ≥ 20 mg/100g	Oil
Rosemary Rosmarinus officinalis Leaf	–	Hydroxycinnamic derivatives (exp: rosmarinic acid) ≥ 8%	Dry extract

REPAIRING

	Plant ratio	Active molecules Titration	Format
Inca Inchi Plukenetia volubilis Seed Oil 		Omega 3 content $\geq 40\%$, Omega 6 $\geq 30\%$ Omega 6/3 ratio = 0,7 Vitamine E ≥ 20 mg/100g	Oil
Tetraselmis chuii Tetraselmis chuii Biomass	–	Omega 3 $\geq 30\%$ of total lipids (ALA > 20%, EPA >7% of total lipids)	Powder

SKIN HYDRATION

Name	Plant ratio	Active molecules Titration	Format
Aloe vera Aloe barbadensis Leaf 	200:1	Aloe sterol	Dry extract
Inca Inchi Organic & Fair-for-Life certified Plukenetia volubilis Seed Oil 		Omega 3 content $\geq 40\%$ Omega 6/3 ratio = 0,77	Oil

SKIN RADIANCE

Name	Plant ratio	Active molecules Titration	Format
Acerola Malpighia punicifolia Fruit	–	Vitamin C $\geq 17\%$	Dry extract
Camu camu Myrciaria dubia Fruit	4:1	Enriched in vitamin C: 25%, polyphenols	Dry extract

UV PROTECTION

Name	Plant ratio	Active molecules Titration	Format
Chlorella (Honey grade) Chlorella vulgaris Biomass	2:1	Lutein \geq 50 mg/100g	Powder, Frozen or fresh paste, Caps/Tabs

SHARON
PERSONAL CARE

PRESERVATIVES

Preservatives	Characterisation
BUTYL PARABEN (BP) 25Kg	Long-chained Paraben can be used alone or combined with other parabens in a blend. Comes as white, dry powder.
ETHYL PARABEN (EP) 25Kg	Along with Methyl paraben, this short-chain Paraben is one of the most commonly used preservative in the personal care industry. Comes as a white, dry powder.
METHYL PARABEN (MP) 25Kg (504185)	This short-chain Paraben is one of the most commonly used preservative in the personal care industry. Comes as a white, dry powder.
PROPYL PARABEN (PP) 25Kg (504186)	Propyl paraben is a very well accepted preservative all over the world. Comes as white, dry powder.
SODIUM METHYLPARABEN (SMP) 25Kg (504522)	The sodium salt of the Methyl Paraben. Highly soluble in cold water. Comes as white, dry powder.
SODIUM PROPYL PARABEN (SPP) 25Kg (504530)	The sodium salt of the Propyl Paraben. Highly soluble in cold water. Comes as white, dry powder.

FLAVOURS & FRAGRANCES

FLAVOURS THAT LEAVE A BIG IMPRESSION

We offer a wide choice of flavours across various food applications, which encompass sweet and savoury flavours for bakery/biscuits, ice cream, beverages, confectionery, oils and fats, dairy products and instant noodles. The range for non-food applications comprises flavours for animal-feed, pharmaceutical, latex-based products and tobacco.

All our products are packed and sealed to ensure quality and safety standards are maintained at all times and to facilitate efficient and effective transportation.

LIQUID PRODUCTS

All liquid products are packed in the following configurations:

- 5kg HDPE Containers
- 25kg HDPE Containers
- 15kg and 20kg Metal

DRUMS

- 1 MT Bulk Packaging

POWDERED PRODUCTS

All powdered products are packed in the following configuration:

- 5kg Aluminum Bag
