

The **innovative** and easy-to-use
online platform for
cosmetic safety assessments

representative and **user driven**: find immediately over 90% of the ingredients daily used in the cosmetic sector and ask for all the ingredients of your interest, not yet present in the tool. They will be implemented quickly and... free of charge

structured: data from scientific literature are an indispensable basis. Why not implement them with the latest *in-silico* methodologies, thanks to the elaborations carried out by our experts with European platforms validated by ECHA and SCCS? A scientific reasoning for each ingredient, to better support the evaluation of your finished product

updated: rely on a referenced team with over 30 years of industry experience and independent University scientific supervision. An essential aid to face the challenges of the *Next Generation Risk Assessment*

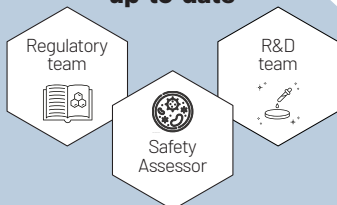

evolving: the SCCS *Notes of Guidance* guides our tool with toxicological data and frames always updated for new challenges and ready for the upcoming regulatory changes

user friendly: forget training courses, local installations, updates, user manuals. Log-in and look for any information that is useful for you.

**Made for every
up-to-date**
